Languages: Java, Python, HTML5, CSS3, SASS, Javascript, C, Linux, Elixir, Haskell, Rust

Developer Tools: Microsoft Excel, Javafx Swing, Bash, Git, Github, Figma, Visual Studio Code, IntelliJ

Libraries and Frameworks: React

EDUCATION

Bachelor of Science (BSc): Computer Science Sept 2021 - Exp May 2025

Toronto Metropolitan University (formerly Ryerson University), Toronto, ON

- **CGPA:** 3.75/4.33
- **Relevant Coursework:** Computer Science II, Data Structures, Linear Algebra, Intro to Software Engineering
- **Awards:** Dean's List 2022, Dean's List 2023

PROJECTS

Ecommerce System Simulator March - April 2022

Designed a ecommerce system simulator with full functionality in Java

- Utilized OOP and methods to efficiently perform ecommerce tasks such as item and customer tracking
- Developed an algorithm using ArrayLists and File IO to connect customers with a corresponding order number
- Utilized maps to allow users to order, cancel, and check their order status on a CLI

AniFeed.io May - Present 2023

Created a anime and manga feed website with React

- Utilized the jikan API to fetch MyAnimeList information on various anime and manga
- Allowed users to search for the specific item they want and also view trending titles
- Users can view anime or manga ratings and synopsis when clicking on the item card directly from MyAnimeList

Gym Buddy May - Present 2023

With a Partner, Creating a MongoDB Express React NodeJS Program

- Allows users to input and track their exercises and stats through front end and will be stored into a database
- Using Suggestic API, users are able to find meals and decide what to eat
- Display weather through the weather API to help users decide their course of action for the day

Web Traffic Management System January- April 2023

Developed a Web Traffic Simulator with a team of 6

- Utilized the Spiral model with incremental approach to organize and design product
- Created Frontend with HTML5 CSS3 and Javascript to make interactive UI with features like real time counters
- Used Javascript for basic user authentication and for objects within the program like a webserver

WORK EXPERIENCE

Summer Student, Full Time, Hydro One, Mississauga ON May - Present 2023

- Assisted Fleet Analysts with data entry, data extraction, using excel
- Compared database information with physical documents and helped update outdated information

Sales Advisor, Part Time, H&M, Brampton ON June 2022 - Present 2023

- Worked in a team of 5+ people to deliver a well maintained store and solved problems that arose
- Adapted to ever-changing work requirements and had helped raise customer loyalty to 75%
